

DETERMINING LADDER POSITIONS FOR FINALS

When two or more teams finish the home and away matches on equal points there needs to be a count back system to determine the final positions. The procedure used for both snooker and billiards is as follows:

Firstly the team(s) with the most wins during the season

Secondly the team(s) with the most draws during the season

Thirdly the team(s) which were higher on the ladder in the previous round and if required in the round before etc.
